E192/E382

Use of the ....

$f$  is the focus of the photocardbine,  $D$  is the dimension of the target,  $K$  is the transverse dimension of the target,  $d_2$  is the longitudinal dimension of the target on the photograph and  $d_1$  is the transverse dimension of the target on the photograph. If the data of the target are known, it is possible to determine  $\varphi$  and  $L$ ; when these are not known, only  $\varphi$  can be calculated. The errors in the bombing can be determined by comparing the calculated data and the actual figures of the photobombing with the tabulated bombing data and taking into account the relationship between the conditions of flight and the aiming of the bomb. Evaluation of the errors in bombing is based on determining the error due to variation in the predetermined flight velocity ( $\Delta V$ ) and the error due to variation in the height of flight ( $\Delta H$ ). These are directly proportional to  $\Delta V$  and  $\Delta H$  and can easily be calculated. There are 3 figures and 1 table.

Title : Protective and Stabilizing Effect of the Hydrosol of  
Iron Orthohydroxide in a Mixed Sol of Trivalent Iron  
Hydroxides.

Orig Pub : Roczn. chem., 1958, 32, No 6, 1397-1400

Abstract : Acid peptization of the x-ray crystalline Fe- hydroxides:  
 $\gamma$ -FeOOH and goethite ( $\alpha$ -Fe<sub>2</sub>O<sub>3</sub>·H<sub>2</sub>O) leads to the for-  
mation of yellow turbid hydrophobic sols which leave a  
deposit on glassware. The red hydrosols produced in the  
peptization of x-ray amorphous Fe orthohydroxide are  
transparent and stable. It was shown by means of sedi-  
mentation measurements and measurements of the degree of  
precipitation by starch that the orthosol protects the  
-FeOOH-sol in mixed hydrosols; half the weight of

Properties, uses, and manufacture of pure silicon. Jaro-  
slav Jagoš (Tech. Univ., Košice, Czech.). *Sborník* ~~1957~~ 41 2  
~~Prac. Vysoké školy Tech. Košice~~ 1957, 95-107. Among  
the phys. and chem. properties mentioned, the most impor-  
tant is the sp. resistance, which is a good criterion of purity.  
Applications in the manuf. of diodes, transistors, photo-  
cells, and SiO films are described. Nine methods of prepa-  
ration of Si are given, the following 4 of them in detail: (1) the  
method of R. Hölbling (C.A. 21, 3107), in which  $\text{SiCl}_4$  is  
reduced with  $\text{H}_2$ ; (2) the method of Beketov as developed  
by D. W. Lyon, C. M. Olson, and E. D. Lewis (C.A. 44,  
961a), in which  $\text{SiCl}_4$  is reduced with Zn; (3) the method of  
P. B. Litton and H. C. Anderson (C.A. 50, 904), in which  
 $\text{SiH}_4$  is decomposed thermally on a Ta filament; (4) the  
method of Wartenberg (C.A. 46, 7452e; 50, 11149g), using  
electrolysis of molten  $\text{K}_2\text{SiF}_6$ . Five methods of purification  
are mentioned, of which the method of zone refining (G.  
Schreiber and R. Schubert (C.A. 51, 6260c); R. Humei,  
Z. Naturforsch. 9a, 67(1954)) is stressed. H. Newmann

TITLE: Radiator filling-cap

PERIODICAL: Referativnyy zhurnal, otdel'nyy vypusk. 42. Silovyye ustanovki, no. 14, 1962. 56, abstract 42.14.340 (Czech patent, class 46 c-4, 11, no. 93651, January 15, 1960)

TEXT: A design for a high-pressure radiator cap is proposed. The cap is provided with three packings. The external packing closes tightly the filling hole of the radiator; the intermediate packing serves as a safety valve of the spring type, adjustable within a pressure limit of 0.01 atm; the third packing represents a check valve for the inlet of air into the radiator in case of vacuum formation in the latter. The radiator cap is provided with a special button for reduction of vapor pressure within the radiator. There is 1 figure.

Lab. Examination of leaks in gas pipelines. K. Jahnke.  
Vestn. Tekhnol., 1952, 8, 243-4. Leaks in gas pipelines are a  
source of loss as well as danger. They are signalled by lack  
of material balance from one end of the system to the other,  
or by excess in loss of pressure. Since there are no known  
methods of locating the leak apart from regular inspection of  
the line, author hopes that "Inventors' Clubs (Rationalizers)"  
may make a contribution here.
